Local and General

Happenings Here, There and Everywhere, Past Present and Future

Painting is the order of the day in Chinook. During last week the Harness shop has been painted and a very striking sign printed across the front of the building. Who's next?

Quite a number from Chinook attended the Sports at Youngstown on the 24.

M. J. Hewitt was a visitor in Calgary last week.

Are any plans made by the local people for the Red Cross membership drive June 5 to 12?

Mr. J. E. Bridgeman, eyesight specialist, Saskatoon, will visit Chinook, Friday, June 3. Mr. Bridgeman was unable to leave the city on May 20, owing to a very serious operation on his wife. However he will be here June 3.

Mr. Jas. Wilkinson, of the Robinson district, made a business trip to Calgary last week.

Mrs. J. R. Black, who has been visiting in Calgary returned Saturday.

There will be no Catholic service at Chinook on June 29, but there will be a service on Sunday June 12, at 8 a.m.

The U.F.A. members in the Acadia constituency will hold a convention in Oyen on June 8.

The Officers and Directors of Chinook and District Agricultural Society are called to meet on Saturday, May 28, at 8:30 p.m. instead of May 21st.

Don't forget the Langford U. F.A. Sports on Friday, June 3rd

Messrs. C. Harnack and Duncan Robert made a business trip to Youngstown on Saturday.

The Chinook Branch of the Women's Institute will meet in the Old Bank Building on Wednesday, June 1, at 2.30 p.m.

Mr. D. Bell was a visitor in Hanna yesterday.

For Soft Drinks, Ico-Cream, and home-made Pastry, go to the White Horse Restaurant. Adv.

Commencing next week, Miss Muriel Stilling, of Oyen, will make weekly visits to Chinook, for the purpose of giving lessons on the piano. Miss Stilling is a wonderful pianist, and has fine technique in piano playing. She has been teaching in Oyen, and has had remarkable results with her pupils. Miss Stilling expects to make her first visit to Chinook on Tuesday, May 31st.

Mr. E. Shabino left this morning for Calgary where he will spend a short holiday.

Remember the Picture Show on Friday and Saturday evening.

Rev. Geo. H. Elliott will preach his farewell sermon on Sunday next, May 29, at the following places: Laughlin 11 a.m., Big Spring 3 p.m., Chinook 7.30.

Village Council Consider Putting Ashes on Roads

At the last meeting of the Chinook Village Council, held on Friday, May 13, the Secretary was instructed to get information regarding the rates on carload lots of ashes from Drumheller. If these ashes can be shipped into Chinook at a reasonable figure, it is most likely that the Council will fix up the roads on Main Street with them.

The Secretary was instructed to inform the Cereal Hospital that Mrs. Howton was properly a resident of Collingwood Municipality.

The Council decided to engage a constable for one month, and the Reeve was asked to appoint a suitable man.

Mr. Wm. Vennard was engaged to clean up the streets and lanes.

The Secretary was instructed to write the Department re the assessment of elevator sites and the equalization of the Village assessment. Also to have published in the Chinook Advance a definition of the word "Guardian" and a warning to parents re the Curfew By-law.

The following accounts were passed for payment:

Join the Red Cross

When the Great War ended—yes, even before the joyful news of the signing of the Armistice—the statesmen and thoughtful men of all countries turned their attention to a consideration of the gigantic problem confronting civilization in the repair of the awful damage inflicted on the world. It was not the material damage so much that was the cause of deep concern, for, given time and money, destroyed cities, towns, industrial establishments, railways, mines and home buildings could be restored.

The real problem were the people themselves. With millions of the world's most able-bodied and virile young men killed, or maimed and weakened for life; with millions of women, helpless nervous wrecks as a result of the strain and hardships and sorrows through which they had passed; with millions of babies and young children under-nourished during the most vital years when wholesome food and plenty of it should have been forthcoming; and with the mental view of everybody far from normal, in many ways distorted, what, all thoughtful men and women asked themselves, of the future of the race, mentally, morally, physically? And if the race is weak in these respects, what of the State itself, because, after all, a nation is just what its people are. It is not wealth, or great industries, or large cities, or famous buildings that make a nation, but the people themselves.

The war had made vividly clear some things which a quarter of a century of peace might not have revealed with so much impressiveness. The war had given us a revelation, for it may fittingly be called a revelation, of the relative worth and ability of the ordinary man and woman. During the war the ordinary soldier, seaman and airmen stuck to their duties and did them with a courage and endurance which have never been surpassed. The spirit of the race had not decayed. But the war had revealed also the shockingly poor physical condition of a great proportion of the men in all countries. In the alleged progress of civilization, in the organization of industries, in the development of big business for creating and controlling wealth, regard for the intrinsic worth of human life—of men and women in good health living and working under wholesome conditions—had been to a large extent neglected.

Think of the significance of these figures: During the last year of war, the number of men called up to the army in Great Britain was 2,425,184. Out of every nine men, three were fit and healthy, two were in infirm health, three might be described as physical wrecks, and one as a chronic invalid with a precarious hold on life. Since that was the physical condition of men at their most vigorous age, what would be the condition of health among the women and children? In other countries the examination of the men called to the colors revealed conditions somewhat similar. In Canada, with all her advantages of open spaces and outdoor lives, of the 362,605 draftees under the Military Service Act, 181,229, or about one-half, were found to be unfit for full service in the field. Even without war the races seemed to be heading for physical deterioration and its wonderful record during the war.

It is the profound conviction of those who are impressed with the importance and possibilities of the ideals expressed in the Red Cross programme as above outlined that their realization is possible through the endorsement and support which universal membership in the Red Cross alone can give. Widespread and popular membership in the Red Cross is, therefore, the necessary condition of success in its Peace-time programme.

To attain that universal membership, a world-wide enrolment campaign is being held this year. The dates in the three Prairie Provinces of Canada are June 5 to 11. Membership in the Red Cross involves an annual fee of one dollar for adults, and of twenty-five cents for boys and girls under 18 years of age, but this is the only—and incidental—financial aspect of the membership enrolment campaign.

It is the intelligent interest, the active sympathy, the whole-hearted support of people on a nation-wide, yes, world-wide, Crusade for Good Health that the Red Cross desires, and to assure this it asks every man, woman and child to join the Red Cross during the week of June 5 to 11. Following all previous wars, the Red Cross with its work for the time being completed, fell into a state of disorganization. When the war drums sounded in 1914, the Red Cross had to undertake all the work of home organization before it could begin its work for the soldiers in the field. Now, however, while carrying on its great Peace-time programme for the welfare and betterment of all mankind, it will be maintained fully organized, efficient and ready to act should Canada ever again be called to arms.

The Red Cross demonstrated that it was worthy of support during the war. Having now highly resolved to dedicate itself to the task of carrying out the obligations imposed upon it in the Covenant of the League of Nations, it can be trusted to faithfully endeavor to render real Peace-time service to Canada and its people. Therefore—Join the Red Cross.

Reindeer Attracted By Settlers.

According to visitors from the Abitibi region, reindeer, which has not been seen in that section of the province for several years, are reported travelling by groups of ten and fifteen and have apparently been attracted by the strange sight of new settlements. Bears and wolves, which years ago were quite numerous, are growing very scarce. Fishing is reported to be exceptionally good in the same region this year.

Will Use Escaping Gas.

It is reported that the Imperial Oil Company will erect a \$350,000 plant at their Regina works to utilize escaping gas in the manufacture of gasoline.

Experienced Agriculturists For West. Conducted parties of immigrants is the order of the day. On board the Canadian Pacific steamer "Scandinavian" which arrived during the week from Antwerp, were fifty Dutch farmers, a land party, bound for Ontario and the Canadian West. On the "Metagama" was a party of sixty English girls travelling under the auspices of the Overseas Settlement Board, and a party of about the same size of experienced agriculturists bound for western farms.

French Have Largest Standing Army

Nation Controls Two-Thirds of Europeans Under Arms.

France and Poland lead by large majorities the other continental nations of Europe in military effectiveness now under arms, according to British statistics. The table of the continental armies is as follows:

Austria, 30,000; Belgium, 105,000; Bulgaria, 33,000; Czech-Slovakia, 147,000; Denmark, 15,000; Finland, 35,000; France, 800,652; Germany, 100,000; Greece, 250,000; Hungary, 35,000; Italy, 300,000; Netherlands, 21,000; Norway, 15,000; Poland, 600,000; Portugal, 30,000; Spain, 190,475; Sweden, 56,200; Switzerland, 200,000; Serb-Croat-Slovene State, 200,000.

France controls approximately two-thirds of the slightly more than 3,000,000 men reported under arms to-day in Europe. It was pointed out, by her understandings with Belgium, Czech-Slovakia, Poland, Rumania and Jug-Slavia.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm kitchen will cure many a journey the doctor. It is not only good for the children when taken with colds and croup, and for the mother who suffers from pains and aches, but there are directions for use on sick cattle. There should always be a bottle of it in the house.

Will Complete, The "Bismarck"

Belfast Shipbuilders Will Take Over Ship Left Incomplete By Germans.

Messrs. Harland and Wolff, the Belfast shipbuilders, are to send a party of experts to Hamburg to supervise the completion of the Bismarck, the biggest ship in the world, which is to be the White Star Majestic.

She was specially mentioned in the Peace Treaty, and it was agreed that she should be completed and delivered to Great Britain.

But progress has been very slow, and there have never been more than two or three hundred men working on her. A fire in October caused further delay.

Germany has excused herself by saying that she has been quite unable to get anything like definite instructions from the Allies.

For long it was doubtful whether any company would buy her, but at last the White Star came to terms and obtained her as a counterblast to the purchase of the Imperator, 4,000 tons smaller, by the Cunard line.

A Friend To the Aged!

When men and women get past middle life, their energy and activity, in many instances, begin to decline, and their general vitality is on the wane.

The heart action becomes weak and uncertain, and the nerves more or less tense.

Little sicknesses and ailments seem harder to shake off than formerly, and here and there evidences of a breakdown begin to appear.

The time has come to maintain their health and vigor and retain the energy unimpaired should use Milburn's Heart and Nerve Pills.

They make the heart beat strong and regular, build up and invigorate the nervous system, impel the memory, and impart a sense of buoyancy to the entire system.

Mrs. James Perry, Retlaw, Alta., writes: "Some months ago I was not feeling well and my heart and nerves were quite unimpaired. I used Milburn's Heart and Nerve Pills. I took them a few days and my, what a change that was in me and my wife. I talked to the doctor and he said 'I feel so much better I quit them.' Now I take them at intervals, and am fine although 72 years of age."

Price 50¢ a box at all dealers or mailed direct on receipt of price to The Milburn Co., Limited, Toronto, Ont.

What Strikes Really Mean

Merely An Attempt to Get Behind Constitutional Government.

There can no longer be any pretence about the character of the present labor troubles. It is an attempt to get behind constitutional government. Wages are not the issue; conditions of labor are not in dispute; the primary object is direct action for a purpose which concerns the whole community. Let the miners' leaders succeed in their challenge, and they will prove that they and not the government and parliament, are the ultimate arbiters of our destiny. It is possible, too, to trace the most malignant influences in the action of the extremists, to whom on this occasion the responsible leaders have made surrender.

After a woman says: "There's no use talkin'," she keeps right on.

THE COCA-COLA COMPANY
Winnipeg, Montreal and Toronto

Good Canadian Citizens

Scandinavians Are Hardworking and Intensely Patriotic.

A most gratifying feature of Scandinavian settlement in Canada is that it is almost wholly agricultural, and in the west they will be found in the richest and most progressive districts. While retaining their national individuality, their customs, language and religion, they are British in sentiment and intensely patriotic, as their fine contribution to Canada's army evidenced. With an inherent realization of their own worth, they stand, without embarrassment, upon their own feet, and are absorbed as Canadians without losing their individual qualities. Clean-blooded, thrifty, ambitious and hardworking, they are of the best of Europe's contribution to a pioneer nation.

IF Your Skin is 'Rashy' use Zam-Buk

Mr. R. H. Barker, Glencalvin, Ont., writes:—"My skin broke into an itchy rash which spread to my hands and face that I was soon too disengaged to work. With a zinc-Zam-Buk caused the eruptions to die away. It soothed and purified my skin so quickly that I could hardly believe how bad it had been." *Ring-hands Zam-Buk is unique in its power to relieve the Abcesses, Blisters, Ulcers, Ulcerative fistulas, Eczema, &c.*

Why Rain Melts Rocks

Due to Carbuncle and Nitric Acid In Water.

When we see great boulders of hard rock such as granite, it seems almost incredible that rain has the power of melting them.

In rain there are two things in addition to water which assist this wonderful process. These are nitric acid and carbonic acid, and these are formed in the rain when the oxygen and nitrogen become charged with electricity as so often happens during thunderstorms.

Of these two acids that slowly eat their way into the rocks, perhaps carbonic is the more important.

By its action it gradually melts the hard granite upon which the rain falls and so transforms it, first into sandstone and afterwards into sand.

Of course this process is a very slow one, but it goes on with a wonderful certainty.

These two acids in rain are even more important in their relation to life, for carbonic and nitric acids form part of the food upon which all plants live.

Crude Oil in Ontario.

While digging a well four miles north of the steel plant at Sault Ste. Marie, crude oil was struck on the Janionson farm. Two new companies have been formed to handle same, but until an analysis is made, the quality cannot be determined. Much interest has been aroused and many prominent oil men have visited the scene of the new discovery during the past week.

The University of Calcutta has 26,000 students, the largest enrolment of any university in the British Empire.

The Poor Man's Friend—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and portability to which it can be made fit the poor man's friend. No dealer's stock is complete without it.

Moral Molasses.

Ad in New York Times.—"Wanted Adeswoman to sell molasses of unquestionable ability and character."—Boston Transcript.

Snake shooting is a favorite pastime of the Bedouin inhabitants of Palestine.

Truth is stranger than fiction to most people, probably because they don't care for an introduction.

Flavor and strength are ideally combined in Gold Standard Tea, ask for the Blue Label. The Godville Co. Limited.

The Most Economical Work Shoes For Summer

Men, who are on their feet all day, certainly do appreciate the economy.

There are FLEET FOOT Heavy Shoes for work—and many other styles and White Shoes for "dress-up."

Put the whole family in FLEET FOOT this summer; it is a wise economy.

The name **FLEET** is stamped on every genuine FLEET FOOT shoe. Look for the name. It means style, comfort, long wear and economy.

Ask your Shoe Dealer for Fleet Foot and make sure you get Fleet Foot.

Old Fort Ellis and Sioux Indians

Crossing the Plains to Fort Carlton
Summer 1875.

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

(Continued)
On looking over my last article it may be that my readers will be left with the impression that Chief Factor Archie McDonald was a tyrannical, unjust man, but this was by no means the case. You, however, must understand that Hudson's Bay officers in charge of districts at this time had practically absolute powers. Truly, Canada had taken over the country, but her jurisdiction for all practical purposes ended when you left Fort Garry (now Winnipeg), and in the great realm of the Northwest the H. B. Co. ruled supreme. They had jails at many of their head posts, with handcuffs and leg irons for unruly servants, or law-breaking Indians, and they used them when required. Give absolute authority to any man and he is apt to become more or less of a despot. Shortly after leaving the Hudson's Bay service in 1883, and being at that time in poor health and circumstances, Mr. Archie McDonald was exceedingly kind and helped me to get a start on my own account.

To resume our trip across the plains, the rate of progress daily was governed by that of the loaded carts, whose squeals from wooden axles could be heard for miles, in spite of constant applications of grease. From twenty to twenty-five miles daily was a fair average and one must know that the ponies subsisted entirely on grass, as oats were unknown in the wilds. Consequently the men would start with the carts very early in the morning, while the boughs and us clerks would have breakfast much later and easily catch up with the train for dinner. Ahead of the party rode Chief Guide Jean Homme, generally with me by his side, thirsting to imbibe all the plainsmen's lore possible, and sometimes the other clerks were with us. Armed guards had to be set nightly, and the horses watched very carefully, for stealing was rife, and no doubt our large brigade was spied upon from time to time by scouting Indians. The prairie was covered with fresh buffalo sign and the guide's opinion was that a large herd was just to the south of us. In fact a few old bulls were sighted by our riders, but Mr. Ewen would not allow any hunting for fear of laming or injuring the horses, and this much to the disgust of we youngsters who were all anxious to shoot a buffalo.

About the tenth day out we met a small war party of Saulteaux coming in from the great plains to the southwest, en route to Fort Qu'Appelle. They met us all marching on foot, with drums beating, their headmen rigged out in scarlet cloth, paint and feathers galore. There was the usual shake hands and a smoke, then small presents were handed to them by Mr. McDonald and, in return, we received a welcome supply of tender young buffalo meat just killed the day before. They had no carts, only travois, that is the log poles, two of them lashed on each side of a pony, a parchment laced across behind the horse and on this robes, dressed buffalo leather, dried meat and pemican were piled, even their large spindled dogs were taken in the same way. With the exception of a violent wind-storm that made things lively for a while, nothing of importance happened until we reached the south branch of the Saskatchewan, and here we had some fun in crossing the river, there being no ferry. We made rafts of the large wooden cart wheels over which buffalo parchments were laced.

(To be continued)

Could Not Escape Law

Man Wanted In Saskatoon Arrested In Scotland.

Saskatoon.—The long arm of the law reached out from Saskatoon to Edinburgh, Scotland, and gathered in Joseph Murray, alias Joshua Murry, wanted here since last December for a \$700 forgery. Tattooed figures of women and King William on horseback betrayed Murray to the Scottish police. The man will be brought back here for trial.

Belgium-Luxembourg Treaty.

Brussels.—An agreement has been reached after months of negotiations between Belgium and Luxembourg and a treaty was initialed by Mr. Jasper, for Belgium and Emile Reuter, the Luxembourg foreign minister.

Ex-Kaiser's Son Convicted.

Berlin.—Eitel Frederick, second son of former Emperor William, was found guilty of illegally exporting coal to Holland through the firm of Phillips, Grasser & Company, a

securely, and in the centre of these rude craft were placed the women and children, all baggage, freight, etc. Swimmers were the motive power, and I could not say how many times I crossed the river. The large band of ponies were left to the last and Jean Homme and I took them across, he explaining that on no account must we allow them to circle, but keep them going in a direct course, the remedy if one turned being to splash water in their faces. All went well but it took several days before the whole outfit was safely across. Another day's travel took us to Fort Carlton, which, unlike Ellis, was situated in the valley of the North Branch, close to the river, we arriving there without the loss of a pony or a pound of freight, much to the satisfaction of Chief Factor Lawrence Clark who ruled supreme over the Saskatchewan district with Carlton as headquarters. The fort was much on the same plan as Ellis, but in better order. This fine establishment was burnt in 1885 by accident, as the Mounted Police and Volunteers were evacuating it, after the defeat at Duck Lake.

I was detailed to lend a hand in the trading store and daily my cart, while companies left for their various destinations. Some days after my arrival a packet arrived by canoe from Cumberland House (down the river), and that evening I was summoned to the office, where, in addition to Mr. Clarke, was Inspecting Chief Factor Robert Hamilton. They informed me there was a pressing vacancy at Cumberland, and they were considering changing my appointment from Mackenzie River to that point, but they would like to hear my views. It was all out to me, and so I told them, and it was then decided that I go down the river on the first opportunity. Mr. Hamilton, who came from Peterboro, Ont., and was an old friend of my father's, gave me much wise and kindly advice as to my future in the service where he had spent practically his life time.

Several weeks passed in very pleasant company as Mr. Clarke had a lovely daughter and there were several other ladies at the fort. Picnics, duck shooting and boating were the principal amusements and we, as birds of passage, were not asked to work very hard. A York boat arrived from up the river, and I received orders to embark next morning. The crew were Red River half-breeds and I took up my place in the stern sheets after saying good-bye all round. We stopped at Ft. La Corne for a short time, one Geo. Goodfellow was in charge, and I did not think then we would have stirring times together later on, but, that is to quote Kipling, is another story. Drifting at night and occasionally rowing in the daytime, four days took us to the mouth of the Big Stone River, which empties out of Cumberland Lake into the Saskatchewan. A short pull against a strong current took us up to Cumberland Lake, which is quite an extensive sheet of water, and after a few minutes we were at the wharf of the old historic Cumberland House which, it is said, was the first post established by the Hudson's Bay Company on the Saskatchewan River. Here ruled Supreme Factor Horace Belanger, a French-Canadian, a man of great girth and jovial temperament, very widely known and much liked. He was a half-brother of Letellier de St. Just, at one time Lieut-Governor of Quebec.

(To be continued)

May Get Share

Of First Payment

Canada Entitled to Portion of Reparations Money.

Ottawa.—A small proportion of the first German payment on reparations may come to Canada. The payment of 150,000,000 gold marks made, will, it is stated here, be applied to the cost of the Allied army of occupation. As Canada contributed a small number of men to the army of occupation for a short time immediately after the armistice, she may be the recipient of an amount partially to cover her expenditure.

New Flying Director.

Vancouver.—Captain A. G. Goulding, of the Dominion Air Board, who has arrived in the city, is to be appointed director of civil flying operations in the west, according to an announcement made by Air Board officials. His office will be in Edmonton.

Leader of Progressive Agriculture

Mr. A. Hedley Auld, Deputy Minister of Agriculture for Saskatchewan.

Russians Sent Back To Canada

Russian Soviet Government Refused Them Admittance to Country.

New York.—Russians from Canada who attempted to return to Russia on the steamer Baltinger, have been refused admission, and have been forced to return to Canada, according to a cablegram received at the office of "Soviet Russia" in New York. The message was sent by Maxim Litvinov, representative of the Russian Soviet Government at Revel, and is dated May 17.

The message reads: "The steamer Baltinger with a number of Russians from Canada arrived at Revel, but on account of our refusal to admit the passengers into Russia, was compelled to turn them back. Give this fact the widest publicity, warning Russians against any attempt to reach Russia without passports visted by a Soviet representative."

Fix Time Limit For Disarmament

Allies Demand Reduction of German Army By June 30.

Berlin.—The time limit for disarmament by Germany is fixed absolutely as June 30 in an allied note presented to the German Government. The note which concerns execution of the recent ultimatum demands that the organization of the German army of 100,000 be brought into conformity with the peace treaty by June 15.

Superior munitions and unauthorized fortress equipment surrendered by May 31 and all arms in possession of civilians by June 10.

Germany is required to endorse by May 30 the list of munition factories authorized by the Allies, and stop the output of unauthorized factories. The note further deals with the question of police and demands a reduction in all classes of police to a total of 150,000 by July 15.

Swedes Lower Cost of Production

Wage Earners Resist Effort But Start Has Been Made.

Stockholm.—An effort to reduce wages and cost of production to the present lower level of prices is being resisted by Swedish wage earners generally, but a start has been made in the wood pulp and cellulose industry where wages have been lowered 15 per cent.

One of the largest electrical companies has also come to an agreement with its operatives for an adjustment to a lower basis.

Development of Holy Land.

London.—Headquarters of the World Zionist Organization received a declaration of the British Colonial Office that the British Government desires it clearly understood that in accepting the mandate for Palestine it is determined to maintain order in the country, and to develop all the natural resources of the province, particularly of the northern unsettled part of the province.

The government will further develop its policy of assisting its citizens in the purchase of livestock; it will encourage the work of the Farm Loans Board as far as it is possible to obtain money for the purpose; it will continue the policy of assisting financially the Saskatchewan Co-operative Elevator Company, the Saskatchewan Co-operative Creameries Company and the Saskatchewan Co-operative Stockyards.

W. N. U. 1369

Saskatchewan Premier Issues a Manifesto

States Platform on Which Appeal Will Be Made to the Electorate On June 9th.

Regina.—A general provincial election in Saskatchewan will be held on Thursday, June 9th, with nomination day one week previous, on Thursday, June 2. The fourth legislative assembly of Saskatchewan which has just been dissolved, entered office on June 26th, 1917, and was composed of sixty-two members, of whom fifty-two were Liberals in politics and supporters of the Martin government, six Conservatives, three soldiers, members and one independent.

In his manifesto to the people of the province Premier Martin stated that the most important reason for the holding of an election at the present time is the desire of the government that the people of the province should be given an opportunity to express themselves on provincial affairs at a time when there is no federal election in immediate prospect. The public business of Saskatchewan should be dealt with on its merits and not confused or affected by issues which affect the whole of Canada and questions which are of federal jurisdiction.

Reviewing the work of the past four years, Premier Martin spoke of the extensions of the Saskatchewan Co-operative Elevator system which have recently taken place, including the erection of a large terminal plant at Port Arthur. These extensions were accomplished with the financial assistance of the government. The growth of the Saskatchewan Co-operative Creameries, the progress made in cooperative marketing of livestock, and the success of the co-operative stock yards was briefly referred to.

In spite of very difficult financial conditions, about \$7,500,000 has been loaned to farmers by the Farm Loans Board. The relief work in sections of crop failure, public health work, educational progress, were reviewed, and the government pledges itself if re-elected to, to the following policy:

To continue the principle of co-operation between government and people in the solution of the economic problems connected with production and marketing, and as far as constitutional and financial powers would permit, to co-operate with the farmers in any practicable method of improving the system of marketing grain and farm products generally.

To continue the fight that the government is now waging for lower freight rates.

To provide for an agricultural survey of the province by the Saskatchewan College of Agriculture and the establishment of demonstration farms under the control of the college in close touch with the people.

To make a thorough investigation of the whole problem of tuberculosis in Saskatchewan, by experts in the treatment of the disease, in addition to the support which the government is giving to the Qu'Appelle Sanatorium.

To continue vigorous enforcement of the Saskatchewan Temperance Act.

To continue the policy of consulting the representatives of labor on all matters affecting their interests.

To continue the various lines of progress already established in the educational life of the province, always keeping in view the necessity of ensuring to every child the most efficient elementary education possible; a thorough knowledge of the English language and the widest opportunities for higher education.

To further develop the co-operative highway system in the province, the foundation of which is already laid; continuing provincial assistance in the construction of main roads leading to market towns in co-operation with rural municipal councils, the work itself to be undertaken by the municipalities which have the necessary organization and equipment to do the work efficiently and economically.

The fullest possible development of the telephone system of the province, consistent with good business principles.

The government will put forth its best efforts to obtain from the Dominion on authorizes the transfer to the province its natural resources, and will also further develop the work of the Bureau of Labor and Industries in investigating and making known the nature, extent and industrial value of the natural resources of the province, particularly of the northern unsettled part of the province.

The government will further develop its policy of assisting its citizens in the purchase of livestock; it will encourage the work of the Farm Loans Board as far as it is possible to obtain money for the purpose; it will continue the policy of assisting financially the Saskatchewan Co-operative Elevator Company, the Saskatchewan Co-operative Creameries Company and the Saskatchewan Co-operative Stockyards.

Depletion Of Funds

May Settle Strike

Of British Miners

Poles Ask U. S. For Support

State Department Says Question Is Essentially European.

Washington.—Poland has appealed informally to the United States for support in the forthcoming consideration of the Silesian plebiscite by the Supreme Council. The request, which is understood to have been transmitted by Prince Lubomirski, Polish minister here, was a repetition of one first made to the state department under the last administration.

Though no official statement of the attitude of the United States Government toward the request has been made public, the state department has let it be known that the United States intends to take no part in the settlement of the Silesian question through the Supreme Council because it considers the question essentially European in scope.

The executives of the Transport Workers' and the Railwaymen's Union have jointly reaffirmed their decision that members of these organizations shall continue to refrain from handling imported or "black-leg" coal. This, however, is hardly likely to affect the existing position materially.

Trade union funds are now depleted more than ever previously in modern times. The London tram service is almost normal again, the power house being operated by volunteer labor, assisted by naval ratings. The Glasgow dock situation is unchanged. Four hundred volunteers are working and sleeping on the docks, among them being women volunteers who are accommodated on the ships. Two ships from Montreal loaded mostly with foodstuffs are being discharged in Glasgow. The Government is making a good display of force about the docks and machine guns are posted at strategic points but as yet there has been no occasion for the use of force.

Lord Londonderry's proposal to his fellow coal owners relative to the amalgamation of the collieries to save overhead expenses has been coldly received. A shortage of coal through the country generally as a consequence of lack of coal has led "Punch" to remark that it feared something serious would eventually happen.

Crowds Jeer London Radicals

Meeting Broken Up by Cheers For King and Queen.

London.—The temper of the people toward the Communists who were permitted to preach their doctrines here unhindered, was shown by an incident in Trafalgar Square the other day.

After the strains of the "Red Flag" had been stoned at a Communist meeting, a former officer, wounded so badly he could scarcely stand, stood up in front of the crowd numbering several thousand, and called for cheers for the King.

The response to his appeal was ear-splitting. This so enraged one of the women members of the Communist crowd that she rushed upon the officer and cuff'd him roundly. Therefore he called for three cheers for the Queen, the Prince of Wales and Mayo Lauder. "Punch" to remark that it feared something serious would eventually happen.

Desmond Must Stand Trial.

Vancouver.—O. T. Grattan Esmond must stand trial at the criminal assize court on a charge of uttering sedition. The grand jury returned a true bill.

Esmond was refused permission to land in Australia and was sent back to Vancouver where he is said to have committed the offense named in the charge.

Lloyd George Says Britain Must Support Treaty

Premier Will Make No Retraction From Statements Regarding Silesia.

London.—Mr. Lloyd George issued a statement reiterating the British attitude toward the Upper Silesian question expressed by him in his recent speech in the House of Commons and disclaiming responsibility for the "distorted reports in the French newspapers."

The prime minister's statement began as follows: "I adhere to the statement I made in the House of Commons on the subject of Silesia. Naturally, I can only accept responsibility for what I actually said and not the truncated and distorted reports in the French newspapers. The almost unanimous approval given by the United States and the Italian, as well as the British press to the sentiments I then expressed, shows that the great nations who stood by the side of France in the war mean to interpret the treaty of Versailles fairly."

The time of making gardens is at hand and it is also time to pen up those chickens. There is perhaps, nothing that causes as much hard feelings in a locality as for chickens to wander on a neighbor's premises and garden. Some say they do not do any harm. That makes no difference your neighbor does not want to be annoyed with your chickens and you should not cause trouble by allowing your fowls to run at large.

Semi-Monthly
Crop Report

Favorable seeding conditions before and at the beginning of the month have been bettered by a continuation of favorable weather. Wheat seeding has advanced rapidly and is practically completed over the province. There is plenty of rain in Southern Alberta. Central Alberta is increasing its wheat crop and the Peace River country is well advanced particularly in the Grande Prairie districts.

The wheat area in Southern Alberta is about the same as last year, but more wheat has been sown in Central Alberta than last year and from thirty to fifty per cent, more in Peace River Valley. There has been a corresponding decrease in oats. Oats will be cut from thirty to fifty per cent in the Peace River country and from ten to twenty-five per cent in Central and Southern Alberta. Barley will be cut some also.

As noted in the previous report seeding opened from two to four weeks earlier than last year and operations have gone on well. The completion of the wheat seeding was marked by heavy rains and some snow which will bring the crop forward rapidly. There is a good showing of wheat already above the ground in all three divisions of the province and the prospects are favorable to a good crop. There is still a lot of grain in the Peace River country that can not be profitably shipped on account of low prices and high freight. It is estimated that there are five hundred thousand bushels of oats west of Peace River on the north side still in the hands of the farmers, the greatest quantity being around the Waterford district. There is a considerable quantity of oats and barley held in Central Alberta also. The only drawback with respect to growth is that nights have been rather cold. There has been a little frost every night up to the 12th of the month but the weather now seems to be changed for the better.

Shortly after the beginning of seeding the was considerable wind but the moist condition of the soil prevented any serious damage being done from this cause. At present the grasshopper menace is rather quiet owing to heavy falls of rain and snow in the south but some injury is expected from them. The ground is reported to show enough of healthy eggs to make considerable trouble a little later.

A U.F.A. meeting, pic social and programme will be held in Chinook, on Friday, May 27, at 8:30 p.m.

Letting Georgette do it!
—Tribute in Sioux City Tribune.

Inevitable Results of Colonization

CHANGE IN TRAIN SERVICE
COMMENCING MAY 1st.

The settlement of unoccupied farm lands near to existing railways, by the Western Canada Colonization Association and cognate agencies, will certainly bring:

FOR THE LOCAL FARMER

A permanent advance in the sale value of his land.

Better wagon roads because there will be more people to pay for them.

Improved social conditions and a richer community life.

A reduction in the school tax, or more efficient schools without any increase in the rate.

The conversion of struggling missions in prosperous congregations.

The checking of gophers, weeds and other "wild land" pests.

An ever-growing power for the agricultural interest in the councils of the nation.

More favorable marketing, purchasing, elevating, and storage conditions. (Against such positive advantages it is idle to raise the bogey of lower prices through increased farm production. The crops of Western Canada will never determine world quotations on food stuffs.)

FOR THE LOCAL MERCHANT

More customers from the country; more motors in front of his store. A growing town trade.

FOR THE LOCAL MAN

More sales of farm lands. A former tendency in town values.

FOR THE VILLAGE AND TOWN OUTLOOK: An enlarged municipal outlook; a new civic pride. Better streets, sidewalks and buildings. The conveniences and artistic developments which come with population.

FOR THE NATION

A steady reduction in the deficit on the National Railways.

A progressive easing of the burden imposed by the National Debt.

A new confidence and faith in the future of Canada.

Children's Day at Colhollowe
On Sunday, June 5

Children's Day will be observed in the Colhollowe church on June 5. A Missionary programme will be given by the children at 2 p.m. Also there will be a song service and preaching in the evening at 7:30. We are asking the people to bring their lunch and stay for the evening meeting too. Come and share in the blessings of the day.

Rev G. H. Bauerle, Pastor

Now's the time to paint that car. We have Effecto Auto paint Top Dressing and Body Polish. See us for prices.—The Service Garage, Chinook.

Westbound passenger 4 a.m. every day except Monday.

Eastbound passenger 1:33 a.m. except Sunday.

Eastbound Local Mon., Wed., and Friday at 11:55 a.m.

Your Red Cross Calls

Red Cross to-day is the vision of a wonderful ideal. Faith and effort can carry it to a glorious reality.

Its peace-time mission is to save lives and to help the suffering, exactly as it was on the battlefield.

It can ward off disease from your child and mine and the child that is yet unborn and make the world a better place for him to live in. It can ward off pestilence and contagion from your own community and so protect us all. It can help weld all the people of our country and of all the other countries into the common brotherhood of sympathy that is so necessary now if humanity is to keep to the path of progress.

Red Cross has not forgotten the crippled, the blinded, the helpless, or the simply remnant of war, in our hospitals and throughout our land.

She remembers them, and has the resources and devotion to care for them, but she also has a new and a broad work to do for which your endorsement is now asked.

The membership enrolment is a nation-wide reminder to everyone who has ever helped the Red Cross, or been helped by it—and who has not—to renew their allegiance to its sacred emblem, identify themselves by their membership with its effort to better the condition of humanity at home, throughout our Dominion, all over the world.

When you could see with your own eyes that your son was in danger and could be helped, you did not hesitate. You can still see the dangers that surround him everywhere, if you but look with the eyes of understanding.

Learn all about the Red Cross Mission for health. Join the Red Cross and enlist in its crusade.

Mackenzie Field Was Discovered In 1914 By British Canadian Pioneers

(By William E. Park, in Oil and Gas Journal, of Tulsa, Oklahoma.)

The story of the early beginning of the Mackenzie field of Northern Canada is told in a communication recently received from Dr. T. O. Bosworth, former head of the Imperial Oil Ltd., geological department, and now operating in Northampton, England, as a consulting geologist and petroleum engineer. In part, Dr. Bosworth writes:

Now that the opening of the oil fields of the Northwest Territories has aroused such widespread interest, the true tale of their discovery may be worth while.

The current story is that Canada's new oil field was found recently by certain geologists from afar, who visited Alberta for the first time in 1919, is entirely false, and doubtless would be contradicted by these gentlemen. The oil fields were determined and the oil well was located seven years ago wholly and solely by British Canadian pioneers, geologists and business men.

Oil seepages in the north were found and first recorded about 130 years ago by the explorer Mackenzie, and they were further noticed also by Franklin a century ago. If the "oil age" had dawned sooner these men would have been known as the discoverers of the field.

Subsequently, seepages in various localities were found by R. G. McConnell, of the Canadian Geological Survey, and were referred to in the report of his exploration of the Mackenzie basin in 1891. But it was not until 1914 that professional oil geologists surveyed the region and located the commercial quantity of oil.

Early in 1914, just before the main Alberta "oil boom," a little group of enterprising and far-sighted Canadians met in Calgary and planned this discovery which is so important today. Their geologist had "turned down" the Okotoks field. But what of that? There must be oil somewhere in this big country, so let him go after it wherever it may be.

Chief among this group were E. C. Lovell and J. H. Woods, of Calgary, and J. K. Cornwell, of Edmonton, the well known pioneer of the northland. The geologist was the writer of these notes.

In the course of fairly wide experience I have never seen such a quest embarked upon by business men. Great is the credit due to them. The expense was large, the prospects of discovery were problematical, and if any field were to be found it would be in one of the most remote places in the world.

The outlook in 1914 was very different from that of today. At that time there were no railroads to McMurray or to Peace River, and the only way in was by scow, down the rapids of the Athabasca. Crude oil, moreover, was worth only a fraction of its value today.

But all parties were resolved that some day oil from the north would be required, and even though that might be many years in the future, the discovery would, at any rate, be something worth while done for Canada.

Thus, at the beginning of May, when oil men from all over America were flocking to Calgary, our expedition set out from Edmonton to the north. The party included four geologists, namely, the writer and his brother, P. C. Bosworth, since killed in France; A. H. Low, still in Canada; and A. Proctor, now in Burma.

We travelled with the Northern Trading Co.'s fleet, at that time captained by Campbell Young and Geo. Slater. The search was continuous throughout the whole of the 1,700 miles of the waterway, and parties were sent out also east and west at many points.

At some of the places where good prospects had been expected, none was found; whilst some of the best things turned up in unexpected places. By the end of the summer the main features of the stratigraphy and the structure had been determined.

During the expedition all conclusions were carefully concealed, for there were only three of us available to stake claims on the Mackenzie. The staking of these three claims was done secretly to avoid being surrounded by others. This was rather difficult and caused two of the party a long, hard journey out very late in the year, after the last steamboat had gone south. But it was decided worth while for it is on these claims that the Imperial Oil Co. has struck oil, and had it not been for our pre-

cations in 1914, it might have cost a very large sum in 1919 to buy up the surrounding claims.

As we were so few in number, only one of the Mackenzie oil fields could be filed upon in 1914. And so great care was taken to select a place where some production was practical, though this may not, in the end, prove to be the best field.

The three claims were filed by A. C. Bain, T. O. Bosworth and A. Proctor. The well site was placed at the junction of the two latter claims, near the river bank.

There is no need just now to write of the work we did on the Great Slave Lake and in the other districts. But at length the expedition returned to Alberta, only to find that the war had broken out and the world was changed. Further progress with the oil scheme was impossible.

At length in 1919 the Imperial Oil Co. decided to drill the test well and develop the field. They acquired the leases, and at heavy expense they overcame all obstacles and drilled the well. That success has crowned their efforts must be a matter of satisfaction to us all, for in this the company has done a service to the country, for which they deserve a good return.

Credit is due to Mr. Sutherland, Mr. Patrick and the rest of the drilling crew who have successfully drilled the most northern oil well in the world.

Important investigations by the Canadian geological survey are in progress, and their forthcoming reports will be eagerly looked forward to by all who are interested in oil in the north.

What Makes Britain Great

People Always "Carry On" In Spite Of Difficulties.

The way in which the British Government is dealing with the huge financial obligations entailed by the war is an example to the nations. The statement made by Austin Chamberlain, late chancellor of the exchequer, enables one to realize to some extent what the mother country is accomplishing. Last year the national debt was reduced from £7,829,000,000 to £7,573,000,000—a reduction, roughly speaking, of more than a billion and a quarter dollars. In the foreign debt alone the reduction is £117,154,000. The debt to the United States was cut down by £75,000,000 and £20,000,000 was taken off the debt owed to Canada. The debts owing to other countries were wiped out. In the last two years the nation's external debt has been reduced £203,000,000, or about a billion dollars.

This has been accomplished by means of very heavy taxation, and in spite of the fact that the government found it necessary to incur an extraordinary amount of current expenditure.

It is not likely that this year's record will be so favorable, for the industrial troubles and the depression in trade will diminish the country's financial resources. But we may be sure that the British people will "carry on" in spite of all the difficulties they may have to encounter.—From the *Hamilton Herald*.

Farm Laborers Wanted

Hundreds of Experienced Men Could Be Placed at Once.

There is an increased demand for experienced farm laborers in Southern Saskatchewan. Swift Current reports about 85 required in that locality, whilst several hundred could be placed at Moose Jaw and other points.

The average wage being offered is \$60 and board.

In the province of Saskatchewan during the past week there were 1,156 farm vacancies registered, and 1,092 farm hands who applied for work, 1,049 were placed.

Completed Round-the-World Trip. The steamship "M. S. Dollar" has arrived at Vancouver after completing a 26,000-mile round-the-world trip. This ship sailed from Vancouver on October 9th, 1920, and it is claimed to be the first round-the-world trip made by a ship flying the Canadian flag.

Claim Discovery.

Discovery of a satisfactory substitute for bone black, or bone-char, the material used in decolorizing and refining sugar and various liquids, syrups and oils, is announced by the Atoms Powder Company, Washington. Scientists have searched for 60 years for such a substance, it is said.

Big Campaign Planned For Oil Fields

Many drilling Outfits Will Operate in Alberta.

Before the middle of the summer has been reached, it is estimated that more than fifty modern oil drilling outfits will be operating at various points in Alberta in the big campaign that is being planned for this year by the Imperial Oil Co. and other large concerns to test out the potential oil fields of the province.

Plans have been developing within the last month or two in Calgary which will put several very large oil companies in the field with the most modern class of drilling rigs, in addition to the Imperial Oil Company, which expects to have nearly twenty rigs working in various parts of the province and the district north of the Athabasca.

Some of these operations will be in the Pincher Creek district where very favorable oil showings have been uncovered. Other operations will be in the district southeast of Lethbridge, near the Montana border, where already one or two wells have been brought in. Other rigs are to be put into the Nanton field while the Irrua district, east of Edmonton, has also attracted very wide attention.

Canada One Of Many Creditors

Rumaria Owes Millions to Britain, France and U.S.

Canada has little chance of adding to her revenue this year by the payment of the account of Rumaria. This is the opinion in treasury circles in London, and this view is confirmed by Sir George Paish, the eminent financial authority.

Today Rumaria owes Great Britain twenty million pounds. She owes the United States twenty-five million dollars and France ninety million francs. Canada, therefore, is one of many creditors, and while she cannot expect to take precedence over any other nations, yet she has an equal prospect with them in having her debt finally liquidated.

British Warships Sold For Junk

Reported That Britain Was Selling to Help Japan.

Some 200 destroyers, 25 battleships and 50 light cruisers have disappeared from the British navy list during recent months. The British admiralty has issued an explanatory announcement saying the vessels were all sold to British firms for breaking up.

This statement was the result of reports circulated in America that Great Britain was making extensive sales of warcraft to South American governments for eventual transfer to Japan.

Uncle Sam's Fountain Pen

Kept Busy Explaining Resolution To Be Exclusive Home Body.

Every now and then the United States has to send a note to some nation telling it where to head in or get off. Uncle Sam is kept busy with his fountain pen explaining his objection to being an exclusive home body. At the same time his typewriter is violating the speed limit in grinding out notes setting forth our national views on mundane matters. For a country determined to keep out of a League of Nations we are behaving in rather eccentric fashion.

We are everybody's brother-in-arms, but don't want our name in the directory. We want the privilege of chiding, but not the responsibility of association.—From the *Los Angeles Times*.

U.S. Farmers Looking For Land.

Considerable areas of land belonging to the Canadian Pacific Railway near Vermillion, have been purchased this spring and are being broken up. One deal of importance was that in which J. J. Lee, of Montreal, secured 1,000 acres, upon which he will engage in mixed farming. Many United States farmers are in the country looking over improved holdings and raw lands.

Locates New Coal Field.

A new coal field has been located at Flores Island, on the west coast of Vancouver Island. It is the announced intention of the discoverers, J. McDonald and associates, Victoria, to develop this new field.

Should Take a Chancet.

"Grandma, can you help me with this problem?"

"I could, dear, but I don't think it would be right."

"No, I don't suppose it would, but have a shot at it and see!"—London Herald.

Claim Discovery.

Discovery of a satisfactory substitute for bone black, or bone-char, the material used in decolorizing and refining sugar and various liquids, syrups and oils, is announced by the Atoms Powder Company, Washington.

Canadian Delegates Will

Attend Dairy Congress

In Chicago Next Year

Plan For Making Ireland Independent

Lord Hugh Cecil Suggests Member of Royal Family for King.

Lord Hugh Cecil, member of the Privy Council of Great Britain, who is the guest of Lord Londonderry's family in Mount Stewart, County Down, has suggested a scheme by which Ireland would be made an independent kingdom, its king to be a member of the Windsor family, probably the Prince of Wales, to be appointed by the King.

Under the scheme there would be two small Parliaments, one to be located in Belfast and the other in Dublin, and in addition, a "House of Estates" of 100 members. Complete fiscal autonomy would be given to Ireland, but there would be a levy imposed for Imperial defence in proportion to the sum contributed by Great Britain for that purpose.

Ireland, under the plan, would be allowed to have an army but no navy and in the event of war the King of Great Britain could suspend the Irish constitution. Ireland in the colonies would have the right to choose whether they should be subjects of the Irish or British King. If favorably received by the Irish leaders, the scheme would be submitted to a constituent assembly.

Some of the Southern Irish leaders, including John Dillon, to whom the scheme was outlined, described it as "preposterous."

The significance of Lord Hugh's proposal comes from the fact that he is the guest of the Londonderry family, the greatest member of which preserves the use of the Swedish language, and it is recommended that Ireland shall have the right to put three names for governor of the islands, and that the governor shall be elected from this list. If Ireland does not consent to this report recommends that the solution of the matter be left to a plebiscite, which it is pointed out would result in a vote favorable to union with Sweden.

The World's Highest Bridge

Span in Colorado Will Eclipse All Suspension Bridges.

The United States is to have the world's highest bridge. It is to be a suspension foot and burro bridge and will span the gateway to South Boulder Canyon at Eldorado Springs. The bridge will be six hundred feet high and will be erected at a point still indicated by a swinging wire between the two canyons across which Baldwin used to walk for the entertainment of tourists several years ago. On the north side of the canyon the cliffs rise over a thousand feet. On the south of the canyon Castle Rock cliffs rise 650 feet. The bridge will be suspended in the air about six hundred feet, owing to the topography of the cliff forming the gateway, but even at this height it will eclipse any other high bridge in the world. Other famous suspension bridges that will be eclipsed by the Colorado bridge are the Firth of Forth at Queensferry, the Crumlin railway viaduct in South Wales, the London, Niagara Falls and Brooklyn Bridges.

The First Hoe

Primitive Man Used Limb of Tree With Sharp Crook.

The hoe is probably one of the oldest of agricultural implements. When primitive man found a well-formed limb of a tree with a sharp crook he had a hoe for the cutting, and it was with such hoes as these that the Iroquois planted their large fields of corn, and prepared the soil for the planting. This probably was not much "hilling-up" done and less weed cutting. There was a little, for effort was made to keep the weeds down until the corn was high enough to shade the ground. Hoeing was soon finished, and the crop was left to itself until the ears were filling, when the children were sent out to the field to scare the birds away. Farmers today know what damage a flock of blackbirds will do in a cornfield, and what must have been the strength of the flocks when nearly the whole continent was a wilderness?

Chinese Wear Ulsters.

Ulster overcoats have become popular with the Chinese in Manchuria. The wealthier class of Chinese always wear long outer garments of silk, which are easily damaged by rain or snow, and the long ulster, besides offering warmth, protects the expensive silk clothing underneath—Youth's Companion.

Cocoa is more digestible if allowed to cool and reheat after the globules of fat have been removed.

There is probably no branch of agriculture in which Canada has made more progress in recent years than dairy. An opportunity will be afforded next year to let the world know how far this is the case, for in the summer is to be held at Chicago, Ill., the seventh international dairy congress at which there will be present officially appointed representatives from thirty to fifty different countries.

At the sixth congress, held at Berne, Switzerland, in 1914, Mr. J. A. Rudick, Dominion Dairy and Cold Storage Commissioner, was Canada's representative, among a total of 800 delegates representing twenty-nine countries or states.

The congresses are organized under the auspices of the International Dairy Federation, of which any person interested in dairy, corporation or association, can become a member on payment of the annual fee, which at present is twenty francs. Papers are read at the congresses and the reports are published in English, French and two other languages.

Already Mr. Rudick is engaged, by authority of the Dominion minister of agriculture, in preparing for Canada's representation at next year's congress in Chicago, and a committee is being formed on which the heads of the dairy branch in every province will be invited to act.

This committee will arrange for the questions to be discussed and the papers to be read as far as Canada is concerned. A pamphlet will also be prepared and distributed among the delegates descriptive of the dairy industry in this country.

It is further proposed to establish in connection with the congress a bureau of information at which facts will be set forth regarding not only dairying in Canada, but agriculture generally and the manufactures and resources of the country.

In addition, leaflets will be circulated suggesting itineraries for delegates who might like to visit Canada before returning home.

British Locomotive Contracts Awarded

Firm Received Order In Face of Keen Foreign Competition.

A short time ago it was recorded that a leading British firm had received a contract for the repair of a large number of locomotives for railways in Russia. This contract alone is estimated to provide employment for about two thousand men for some years, and since it has been awarded the same firm has secured an order for two hundred locomotives for the Belgian State Railways. A striking feature of this new order is that it was secured in the face of keen foreign competition. Success was achieved on account not only of the moderate price quoted, but in view of the unqualified reputation of British locomotives for efficiency and reliability.

No Halfway About The Scotch

Very Decided Once He Makes Up His Mind.

No half-and-half about the Scotch character. What he hates, he hates; what he likes, he likes. And he lets you know it right away. He is altogether Liberal or Tory. His politics decided, his religion decided; get him right and he is magnificently right; get him wrong, and he is awfully wrong. A Scotchman seldom changes. If he dislikes a fiddle in church you cannot snuff it in under the name of a base violin. We like persistence. Life is so short that a man cannot afford very often to change his mind. If the Israelites in the wilderness had a few Scotch leaders, instead of wandering about for forty years they would in three weeks have got to the promised land, or somewhere else just as decided.—Exchange.

New Reason For Eviction.

On the pretext that he had too big a family, a dairyman of Little, the father of fourteen children, was evicted from a house he had occupied for fifteen years.

An indignant crowd watched the proceedings, and when a sick child in a cradle was placed on the footpath, they attacked the ejectors, put them to flight, and replaced the man's furniture in the house.

"Hercules" Lechner, a Milwaukee carpenter, sometimes uses a hammer, but such a thing as a 60 penny spike he drives through a 2½ inch plank with his bare hands.

DEEP, HOLLOW COUGHS ARE MIGHTY DANGEROUS

That same condition is everywhere now, deep and hollow, why, because consumptive. First it was a cold, next came Catarhoze, vitally decreased then the trouble was very serious. Never neglect a cold, not even a little one. Never neglect a cold, not even a little one. Catarhoze! Get out your "Catarhoze Inhaler," breathe deeply into your lungs the healing soothing vapor of Catarhoze. Let Catarhoze clear out the nostrils. You will detect the change when you are well again. It's really splendid for coughs, colds, bronchial irritation and Catarhoze trouble. Sold everywhere. Two months treatment \$1.00, small size, 50c.

The House On Mercy Street

By Florence Kerigan

Miss Angela set her finger on a tiny little bell, and at once the throng of boys who were whooping madly up and down the hall and in and out of the rooms of the house on Mercy Street, came together in the living room and settled down to listen to the afternoon story.

They just adored Miss Angela. From the time she rented the little house and turned it into a clubhouse for the rough, tough, dirty little boys of the neighborhood, they loved her. They exhibited her to their rough, tough, dirty friends with pride, and gradually became less rough, and less tough, and washed their faces now and then.

On that particular afternoon, when the soft air blew in the open window and made her fair hair stand out from her head like a misty, golden halo, and shook the faint perfume out of the bowl of lilacs on the table, she announced that she was going to tell them a story of knights and fair ladies and the spring. She settled herself in the seat of honor, and swept the circle of faces with her brown-eyes which Abie Rabinowitz said were "just like these here, now, pansy flowers, ain't they?" brown eyes which smiled at them all, from Abie to the mysterious, well-dressed, perfect-manured Jack who came in every day to play.

Then, very simply and dramatically, she told the story of Sir Galahad and the Holy Grail, and all her hearers listened spellbound. And when it came to an end, they sat silent for a moment, then clattered for another.

Next, she told them a rollicking Irish folk-tale that made them laugh, and followed it with others until a factory whistle told her it was five o'clock and closing time for the clubhouse.

They found their hats and trooped out, but Miss Angela remained, and her shoulders drooped with sudden sadness.

That morning she had received a letter saying that she would have to leave the dear little house on Mercy Street, as the landlord wanted it for one of his friends. She had at once called up several influential men and tried to interest them in a campaign for establishing a community clubhouse to carry on the work begun, but without result. One of the men, John Davenport, told her frankly, that he was decidedly against such work—that the poor of the city could rise if they wished, without such waste of money. Still, with a heavy heart Miss Angela fought the thought of giving up her boys.

On Friday afternoon the boys were grouped about the piano singing a few favorite songs when a man's figure stopped in the doorway.

Miss Angela recognized the clear-cut, stern face of Mr. Davenport, and wondered what had brought him there. At the same instant Jack cried, "Dad!"

"Jack, what are you doing here?" The man's voice was well under control, but Miss Angela could see that he was very angry.

Jack stepped out bravely. "Dad, I'm sorry it had to be this way—but

Hannah wouldn't let me come when I asked her. And they were having such fun! I get so tired playing by myself, Dad! Here we have the grandest times! Mickey Mulligan—that's Mickey over there, has a sister, and two rabbits and some white mice, and his father sings the funniest songs. And Abie Rabinowitz lives at a jeweler's store and his father lets me look at some stones just like those of Mother's."

"Why, it's preposterous!" gasped Mr. Davenport. "I'm surprised at you, Jack. You with all you have and all you are, coming here like this and playing with dirty ragamuffins!" Jack squared his shoulders. "I haven't a thing. I haven't a mother to sing to me or smooth my hair or make my little cakes like Jimmy Cindy's mother does, and I have no rabbits or cats or even a puppy—why, I've never had mumps or measles! And I can't sing like Romolo Galacce, or paint like Old Nels. I've just got a lot of old money that won't buy the things I want!" His lip quivered suddenly. "I love them all so much and—never loved anybody before!"

"Old money that won't buy what I want!" The words struck deep, and made him think of the sweet wife money had not been able to hold—of the happiness that money had not brought him—of the mansion which held everything but love and joy.

Micky Mulligan stepped to Jack's side. "If ye please, he's a good guy even if he is a swell, and we like him, sort."

"Suppose you boys go outside and play," in a softer tone. "Miss Sheridan, will you tell me about this business?"

Miss Angela drew up a chair for her guest, and told him the whole story of the club and what she tried to make it stand for and the love of it made her eloquent. Her enthusiasm was infectious and at the end of an hour he was making plans with her for a larger club that would broaden into athletic activities. She shook her head, sadly.

"We're not all millionaires, Mr. Davenport."

"Don't you understand? I want to do it with you. You must count me in on it. Why, I wouldn't take a million dollars for the way these boys treat my son and the happiness you have given him. So, I'll see an architect tomorrow and we'll have a regular clubhouse right in this neighborhood!"

In spite of her protestations, he carried out his purpose, and formed a habit of dropping in during their play hour and showing her the latest plans and talking over new things he had thought of.

Then, one day, he brought some new plans for her inspection. "Don't you think?" wistfully, laying them before her, "that you could make a home out of one of these for you and a lonely little boy that never loved anyone before?"

Miss Angela promptly became very rosy and confused, but her answer must have been satisfactory, for some months later, the boys all met for a feast of ice-cream and cake on a very joyous occasion. And they presented her with a solid silver spoon bought with their own savings from Abie Rabinowitz's father who was a jeweler.

Lord Fisher's "Light Cruisers"

Chancellor Did Not Specify Size of
Light Craft.

A characteristic story of the late Lord Fisher, and his capacity for getting his ideas carried out while at the Admiralty during the war, was told by Vice-Admiral Sir Frederick Tudor at a meeting of the Institution of Naval Architects.

One day early in the struggle, when it was believed that the conflict would not last very long, Admiral Tudor said Lord Fisher came into his room and told him he had just had a long conversation with the Chancellor of the Exchequer, who had agreed to the building of light craft up to light cruisers to any extent. The Chancellor of the Exchequer had not said how big the light cruisers were to be, so Lord Fisher said, "We will build two whoppers with 15-in. guns, big enough to knock any German light cruiser off the sea." This was the origin of the Furious, the Glorious and other ships of that class.

Another Hen Breaks Record.

A hen owned by T. N. Mitchell, of Byron Central, Mich., laid double-yolked eggs every day for three weeks and then produced an egg that weighed six ounces and measured nine and five-sixteenths inches around the long way and one-half inch around the centre. It contained two yolked eggs besides perfect normal sized egg.

HAS NO PAIN NOW

What Lydia E. Pinkham's
Vegetable Compound Did
for Mrs. Baker and
Mrs. Kiever.

Vancouver, B.C.—"I am pleased to say that Lydia E. Pinkham's Vegetable Compound has done me a lot of good. I can walk about without the aid of a support and feel real strong again. A nurse advised me to take Lydia E. Pinkham's Vegetable Compound and it certainly helped me. It seems like Heaven to be relieved after months of pain." Mrs. H. W. Baker, 8874 10th Ave., West, Vancouver, B.C.

"I have taken Lydia E. Pinkham's medicines and they have done me a lot of good. Since then I have been able to do house work and I have a lot of work to do as I live on a farm. So your advertisement in the papers was what made me think of writing to you. I hope this may help some one else." Mrs. Wm. Kiever, 8874 10th Ave., Vancouver, B.C., N.B.

The reason women write such letters to the Lydia E. Pinkham Medicine Co. and tell their friends how they are helped by Lydia E. Pinkham's Vegetable Compound has brought health and happiness into their lives. Freed from their illness they want to pass the good news along to other suffering women that they, too, may be relieved.

If there are any complications you do not understand write to Lydia E. Pinkham Medicine Co., Lynn, Mass.

Care Of The Bedroom

BY LORETTO C. LYNCH

An Acknowledged Expert in
All Matters Pertaining to
Household Management.

Every detail of housekeeping should be attacked from a health standpoint. It is well for the woman to consider this who becomes a little rebellious as spring comes on and wonders, "Why all this fuss?"

The care of the beds and the bedrooms should be especially treated from this standpoint. For a while a dusty chair in the living-room may be undesirable, it is of far less consequence than either a dirty dishtowel or an unclean bed.

The ideal bedroom has at least two windows and is flooded with sunlight and sunshine on bright days. It is large enough to contain a bed. The ideal floor for a bedroom is uncarpeted save for, perhaps, a small rug in front of the bed or dressing table.

After the wood is properly finished, it should be waxed or oiled. The oiled floors of the hospital permit of frequent mopping with a little disinfectant and water.

Single beds are coming more and more into fashion. Health authorities tell us that it is more conducive to both health and comfort for each to have an individual bed. Plain white enameled bed frames are always a wise choice if one's money is limited. But, no matter what the frame, buy the best mattress and spring you can afford.

If you buy a bed mattress second-hand, be sure to send it away to a reliable firm to be thoroughly sterilized. And, in any event, once every few years, mattresses should be sent away for a couple of days. The ticking should be laundered and the hair or other material it contains should be thoroughly and scientifically cleaned.

Every mattress should be protected not only from soil or surface dirt, but it should be protected so that it may not absorb and hold perspiration or other body excretions. To protect it from surface dirt, make or purchase mattress covers of unbleached muslin. These are usually provided with buttons and buttonholes so that they may be fastened after being slipped over the mattress. Rubber sheeting or oiled silk are not exorbitant in price and go a long way toward preventing the absorption of body excretion.

Sheets should be washed and boiled, but need not necessarily be ironed.

Try to air each one of the bed coverings for at least an hour each day. Arrange them so that the air may circulate through them—damp, rainy days excepted.

German Prison Camps.

The Leipzig trials of German offenders may not bring many convictions or heavy penalties, but the evidence taken in London in respect to prison camps shows that the prosecutions are serious. Accounts given by former prisoners provoke indignation, but only confirm the statements of Canadian prisoners who have passed through some of these camps.—Vancouver Province.

For 16 centuries the little republic of San Marino has maintained its independence, although Italy entirely surrounds it.

Liners Bring Many Passengers

Those Travelling Third Class Were
100 Per Cent. British Born.

The opening of the 1921 passenger season in the port of Montreal was marked by a movement of passengers that would be heavy at any period of the year, no less than four liners—the "Minnedosa," "Canada," and "Metagnum" from Liverpool, and the "Canadian Fisher" from the West Indies, arriving on the same day. The high standard of the passengers carried in the third class quarters, who were almost 100 per cent. British born, was the most noticeable feature of the capacity lists.

One Can Be Smelted in Canada

Will Save Dominion Millions of
Dollars Annually.

An associate committee of the Imperial Advisory Council of Scientific and Industrial Research investigating the question of the utilization of low grade iron ores in Canada has reported to the council, and it is now regarded as highly probable that the vast deposits of low grade magnetic iron ores can be successfully smelted on a commercial scale. The value of iron ores, iron and steel imported into Canada exceeds \$150,000,000 annually, and 94 per cent. of the iron ore smelted in Canada is imported. If the research is successful the council feels that a saving of millions of dollars annually to Canada will be effected.

Why The Complaint.

Leaders of the Welsh miners protest against the use of troops which they term violence. Anything more violent than threatening the country with starvation by tying up all trains and stopping industries is hard to imagine.

Worm as Thin as Straw.

Samoa boasts a swarm of extremely slender, like a fine straw, which is eaten like the oyster, both raw and cooked.

The planet Venus moves around the sun at an average speed of 22 miles per second.

Old Time Engineer At Age Of 76 Goes Back To Work On C.N.R.R.

"Although I am now past seventy-six years of age I am working every day, for Tanlac has put me back on the job after I had given up all work and didn't think I could ever get well," recently said C. L. Skinner, 520 Maryland St., Winnipeg. Mr. Skinner has spent the greater portion of his life on the sea, being Chief Engineer on several of the largest ocean liners plying the Atlantic. Twenty years ago he gave up the sea, and is now employed as stationery engineer by the Canadian National Railway.

"There is one thing I hope that never has again," he went on, "and that is rheumatism. It simply had the best of me and I was practically helpless. It had started four years before and I was so crippled up I couldn't do a lick of work. My knees were actually as stiff as boards and of mornings I had an awful time trying to get clothes on; why, the pains nearly killed me. My appetite went back on me and I got so I didn't want to eat a thing. I didn't know what a good night's rest meant and I was as weak as a baby."

"But it's all over with now, thank goodness. Tanlac has simply made a clean sweep of all my troubles and I feel like a man made all over again. Those pains have all disappeared and so has that stiffness and I am eating heartily and sleeping fine like I used to years ago. I take pleasure in speaking a good word for Tanlac. It has certainly done great work for me."

Tanlac is sold by leading druggist everywhere.

B.C. Lumber Stands Test

Timber Included In Specifications for
Imperial Institute, London.

The Department of Trade and Commerce has been informed that practical tests of British Columbia timbers—Douglas fir, British Columbia spruce and western hemlock—by H.M. Board of Works, London, on behalf of the advisory committee of timbers for the Imperial Institute, have proven quite satisfactory, and as a result those woods were included in the official timber specifications of that department as alternatives to European joinery timbers.

Dairy Products In Alberta.

The value of creamery butter produced in the Province of Alberta during the year 1920 amounted to \$5,512,500, while the value of dairy butter amounted to \$25,972,500.

The members of the British royal family are not required to pay taxes on their property, though as a matter of courtesy, they do so.

An Alliance With France

If Separated Britain and France
not Solve Problems in Europe.

Even if the reparations issue be satisfactorily settled, other questions almost as menacing to the peace of the world, will come up, in a long-stretched line, for consideration. What about Central Europe and the ferment in Hungary? What about the external unrest of the Balkans? What about the shadow of Russia and the intrigues in Asia? Separated, Great Britain and France can scarcely meet, much less solve, these grave problems. But united in the bonds of an alliance, they will prove a source of strength which will attract to them all the forces which make for order on both sides of the Atlantic. A Franco-British alliance means peace, and nothing shows better the sincerity of our professional pacifists than the fact that they are about the only persons opposed to its conclusion.—From the London Morning Post.

Are You Human?

A little baby. A little child. Don't they appeal to you? Doesn't your heart yearn to pick them up, to cuddle them close to you, to shield them from all harm? sure it does else you're not human. Being human you love them. Their very helplessness makes you reach out in all your strength to aid them. In health there's no flower so beautiful. In illness there's no night so black.

Save them then. Use every precaution. Take no chance.

When sickness comes, as sickness will, remember it's just a baby, just a child and if the Physician isn't at hand don't try some remedy that you may have around the house for your own use.

Fletcher's Castoria was made especially for babies' ills and you can use it with perfect safety as any doctor will tell you. Keep it in the house.

Children Cry For

Fletcher's

CASTORIA

A Word About Truth.

"Great is Truth, and mighty above all things," So says the Old Testament, yet it is equally true to-day. Truth shows no favors, favors no enemies.

From the inception of Fletcher's Castoria, Truth has been the watchword, and to the conscientious adherence to this motto in the preparation of Fletcher's Castoria as well as in its advertising is due the secret of its popular demand.

All imitations, all substitutes, all just-as-good preparations lack the element of Truth, Jack the Righteousness of being, lack all semblance even in the words of those who would deceive.

And you Mothers, mothers with the fate of the World in your hands, can you be deceived? Certainly not.

Fletcher's Castoria is prepared for Infants and Children. It is distinctly a remedy for the little-ones. The BABY'S need for a medicine to take the place of Castor Oil, Paragoric and Soothing Syrups was the sole thought that led to its discovery. Never try to correct BABY'S troubles with a medicine that you would use for yourself.

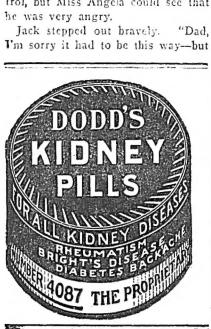

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

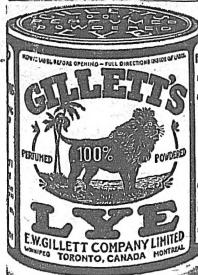

Bears the Signature of

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

Farmers Plant Treated Seed

Electrification Claimed to Increase Yield and Check Disease. Seed treated by a new process of seed electrification, a method which it is claimed will increase the yield, check the spread of fungoid diseases and improve the quality, will be sown this year by many of the leading farmers in Southern Alberta. A plant for the treating of seed has been established at Carmangay, Alta., and already its capacity is taxed to such an extent that an enlargement will be made immediately.

It's easier for some men to make love than it is for them to make a living.

A WOMAN'S HEALTH NEEDS GREAT CARE

When the Blood Becomes Watery a Breakdown Follows.

Every woman's health is dependent upon the condition of her blood.

How many women suffer with headache, in the back, poor circulation, weak digestion, a constant feeling of weariness, palpitation of the heart, shortness of breath, pallor and nervousness? Of course all these symptoms may not be present—the more there are, the worse the condition of the blood, and the more serious the trouble.

It is possible to have our teeth broken down, the best way to make them healthy and strong is to eat a balanced diet.

Dr. Williams' Pink Pills are a splendid blood-building tonic. Every dose helps to make better blood and better tissue. There can be nothing better than a balanced diet, red blood which gives brightness to the eyes and color to the cheeks and lips.

Dr. Williams' Pink Pills build up the blood as is shown by the experience of Mrs. Jos. E. Venetucci, Mrs. Northfield, New Mexico: "For several years I was in a state of semi health. I was pale and nervous, my appetite was poor, and I suffered from weakness, headaches and a feeling of oppression. I got so bad that I was compelled to stay in the house alone. All this time I was taking medicine, but it only did not help me, but I was growing weaker. Finally I decided to try Dr. Williams' Pink Pills, and after using six boxes I felt much better and had a better appetite, slept better, and felt better. However, I continued taking the pills for a couple of months longer and now I am feeling as well as ever.

I give all the credit to Dr. Williams' Pink Pills, and hope that my experience may be of benefit to some other weak woman."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail. 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Last of The "Sennet"

Royal Navy Men Have to Give Up Wearing Straw Hat.

London saw seamen of the Royal Navy in their straw hats at Lord Fisher's funeral last July. Now comes the announcement that the Admiralty has decided to abolish the "sennet," as it is officially called.

At home, the uniform blue cloth cap is to be worn, with the white cap-cover in summer, on the occasions on which the sennet hat has hitherto been worn, and sun-helmets will be supplied to men serving in ships and establishments on foreign stations.

With the passing of the sennet or straw hat there is removed almost the last feature of the picturesque dress of the sailor at the time when uniform was first established.

This was in 1857, but the dress then ordered had been the unofficial or irregular uniform of seamen for many years before that, and was directly associated with the Napoleonic wars.

In these earliest regulations for seamen's uniform the hat was ordered to be black or white, according to climate.

The black hat or tarpuin was abolished 40 years ago, and when 10 years later, the round blue jacket was also abandoned, there disappeared from the seaman's kits the two articles by which he was most familiarly known—the "tar" and the "blue-jacket."

An Unclad Mummy.

In the unchained storage rooms of the railway there is a vast accumulation of trunks, valises and many types of miscellaneous articles, such as umbrellas, canes, coats, hats, rubbers, baby carriages, and once in a while, a crutch or a wooden leg. All of which, apparently, the owners do not think worth while inquiring for. Not long ago a mummy, possibly a descendant of the Pharaohs, crept in and was sold by public auction with other effects.

Typewriters Have Peculiar Noise.

Every make of typewriter produces its own peculiar noise by the clatter of the keys. An expert recently recognized and named correctly 20 different machines simply by the sound of their operation.

The longest record flight of a carrier pigeon was from Pensacola, Fla., to Fall River, Mass.

A form of pumice stone has been discovered in Japan, which can be used in concrete for boat building, making a concrete as strong, but 60 per cent. lighter, than the ordinary kind.

Ask for Minard's and take no other

"Your Teeth"
By Rea Proctor McGee, M.D.,
D.D.S., Editor of Oral Hygiene,
DIET.

Copyright, 1921, by Rea Proctor McGee.

When a raw recruit has been in the service long enough to learn that the shells and bullets that miss him do not hurt, he becomes a veteran. When he learns by experience that the missiles that strike him do hurt, he becomes a casualty.

The best way to have our teeth become veterans in the service of good health is to take care of them.

It is foolish to expose the teeth and mouth to needless infection by carelessness. Even with the best care that we know how to give, there may be decay of the teeth and infection of the gums, but by careful brushing of the few teeth that are attacked by bacteria, the mouth may be kept healthy and serviceable as long as the rest of the body.

In addition to proper brushing of the teeth, the diet is of great importance.

We commonly think of diet as a treatment for digestive disturbances only.

The mouth is the front door of the stomach and every decayed tooth, and every inflamed spot on the gums, is really a digestive disturbance.

No part of the mouth, stomach, or intestines can be diseased without affecting, to some extent, the rest of the tract.

It is possible so to arrange the diet of a child that the development and retention of the teeth is reasonably assured, and, at the same time, the digestion and general health are benefited.

The one food in the world that is exactly suited to an infant is mother's milk. The children of mothers who are unable to nurse their babies should be given a special diet of red blood which gives brightness to the eyes and color to the cheeks and lips.

Dr. Williams' Pink Pills build up the blood as is shown by the experience of Mrs. Jos. E. Venetucci, Mrs. Northfield, New Mexico: "For several years I was in a state of semi health. I was pale and nervous, my appetite was poor, and I suffered from weakness, headaches and a feeling of oppression. I got so bad that I was compelled to stay in the house alone. However, I continued taking the pills for a couple of months longer and now I am feeling as well as ever.

I give all the credit to Dr. Williams' Pink Pills, and hope that my experience may be of benefit to some other weak woman."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail. 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Hiccup Epidemic Prevalent

Don't get the habit of hiccup—stop the slightest attack at the beginning. Nothing brings such magical relief as slowly sipping a few drops of Nervilax. It is sweet, smooth, and easily digestible, nothing will prove more useful in every hour than a 35 cent bottle of this good old Nervilax.

The proper diet early, has been found very effective in the cause of good teeth.

From seven to nine months of age, baby should have a little toast with butter twice each day. After nine months, rusks and firm mild puddings, a little boiled fish and well cooked chicken come next. Do not forget that butter fat is absolutely necessary for growth.

The proper diet early, has been found very effective in the cause of good teeth.

Industrial Generosity

Increase Superannuation Allowance to Balance Value of Currency.

The spirit in which British industrial concerns interpret their duty to their employees is exemplified by the action taken by two of the leading railway companies in connection with superannuation allowances for old servants.

Owing to the change in the value of currency since the war the original allowance had become inadequate and the companies voluntarily

decided to increase the allowances to superannuate servants and also to improve the scale of benefits for those servants entitled to superannuation.

The action is all the more striking as the only fund at present available for such concessions is the dividend fund. The additional amounts, therefore, come out of the shareholders' pockets.

Experienced.

A Japanese "boy" came to the home of a minister in Los Angeles recently and applied for a position. Now it happened that the household was already well supplied with servants, so the minister's wife said, "I am sorry, but we really haven't enough work to keep another boy busy."

"Madam," said the Oriental politely, "I am sure that you must have, You may not know what a little bit of work it takes to keep me employed!"—Christian Register.

Every make of typewriter produces its own peculiar noise by the clatter of the keys. An expert recently

recognized and named correctly 20 different machines simply by the sound of their operation.

Seasoning doubles the strength of green wood.

The salamander, a kind of lizard, was believed by the ancients to live in the

inflamable complaints that are the result of the degradations of worms in the stomach and intestines.

Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs causing an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

Brightly-colored walls and other

surfaces in factories and workshops are said to lead to increased production.

The crying of weasels and the baying of dogs are considered evil omens by the Japanese.

Minard's Liniment Lumberman's Friend.

No More Constipation or Blotchy Skin

Want a clear, healthy complexion, regular bowel, and a perfect working liver?

All easy to obtain—take Carter's Little Liver Pills, the sure and easy way to a perfect complexion.

For headache, dizziness, upset stomach and indigestion, the have no equal. Purely vegetable.

Small Pill—Small Dose—Small Price

Two Winter Fairs

Regina Holding One in November And One in March.

A winter fair comprising two sections, one to be held in November, the other in March, will be conducted in Regina in the coming season, according to a decision reached at a recent meeting of the board of directors of the Exhibition Association.

In November, when the first section of the fair is to be held, there will be the sheep and swine show, and the calf-feeding competition. The second section of the fair will be held in early spring, probably in March, and will include the stallion, fat cattle and poultry shows.

In addition to carrying out this scheme, an effort will be made by the Fair Board of Regina to establish a circuit of spring fairs, to be arranged with Brandon, Regina, Saskatoon, Edmonton, Calgary and other towns.

Chinook Vulcanizing Plant

Has opened for business and car owners are assured of first class work in vulcanizing and tire repairs. We handle new tires, secondhand tires and tubes. Our prices reasonable. Give us a trial.

Bert Knight, Prop.

Crown Lands Open for Entry

An increased demand by the public for information regarding land settlement is reported by the Department of the Interior at Ottawa. This increased interest is attributed partly to the fact that Crown Lands in Western Canada within fifteen miles of a railway, which heretofore have been reserved for returned men, become available for civilian entry on the 1st of May.

Besides Crown Lands that may be available, it is estimated that there are about 200,000 quarter-sections of privately owned lands lying idle in the Prairie Provinces most of them within easy reach of the railways. The same condition applies, though in a lesser degree, in the older provinces of Canada. This condition is not, however, due to lack of value in the land itself, on the contrary and particularly in the Provinces, much of this idle land is rich virgin soil, for when one considers Canada's vast land area and its comparatively small population it is at once apparent that a large area in private ownership must be unoccupied and available for purchase at reasonable prices.

In addition to its activities in connection with the settlement of vacant Crown Lands in the Western Provinces the Department of the Interior, in co-operation with Provincial officials, has compiled and published very full particulars regarding the unoccupied, privately owned farm lands in Manitoba, Saskatchewan, Alberta, Nova Scotia, New Brunswick and Prince Edward Island. This information which has been published by districts is issued free of charge and includes such details as the price at which land may be purchased, the terms of sale, acreage suitable for cultivation, nature of soil, and value of buildings. With such information in his possession the intending purchaser may negotiate with owners of land in any district in which he is particularly interested.

In their endeavor to find a suitable location prospective home steader or purchasers will find a marked value the dual service which the Department of the Interior through its Natural Resources Intelligence Branch is now in a position to render.

Chinook School Board Meet

The Board of Trustees of the Chinook School District met on Wednesday evening, May 18.

Members present, Messrs. C. Rideout, Varc, Wright, Young and McIntosh.

The following accounts were passed and ordered to be paid as soon as funds were available:

H. C. Briggishaw	\$ 4.05
F. E. Osborne	.50
Banner Hardware	8.55
K. Hohlen	14.00
Western Mun. News	16.29
Mah Bros.	8.00
Sam Wong	7.50
Chinook Advance	6.60
I. W. Deman	1.15
J. M. Montgomery	9.45
L. Proudfit	18.80

That the assessment of the Union Bank building, Lot 9 Blk 1, be reduced to \$6,000, and the bank fixtures to \$1,000, and the old bank building on Lot 8 Blk 1 to \$500.

The assessment of the building on Lot 15 Blk 2, owned by Mr. Peyton be reduced to \$100.

That Mr. Peyton's house on Lot 18 Blk 2, be reduced to \$350. The assessment of the build-

ings on Lot 23 6, owned by Mr. I. W. Deman, be reduced to \$2,400, and the assessment of Mr. Deman's car to \$900.

That Mr. McAlister be notified that the assessed value of the machinery handled by him must remain at \$2,500, and that the matter of part of this being paid by the International Harvester Co., is something for him to take up with the Company.

The Board adjourned to meet again at the call of the Secretary.

Rowdyism

Last Saturday night about twelve o'clock the slumbers of our citizens were rudely broken by the unearthly yelling of a number of men under the influence of liquor. This seems to be a regular Saturday night occurrence by a few, who seem to think they can pull off this unseemly conduct. We understand that the Council have engaged a constable and we hope that he will get busy and stop this kind of thing.

Trees to stop drifting of sand will be planted by the Ontario Government. The orchards in Prince Edward County are being destroyed by sand drifts and the planting of from 75,000 to 100,000 poplar and willow trees, by the forestry department, is an effort to stop the destruction.

The Chinook Girls' Basketball team proved their skill by defeating Youngstown on Tuesday on the latter's grounds, by a score of 20 to 17.

Why "Auto-Shoes"?

We figure that any automobile casing has a right to be called a "tire"—whether it's good, bad or indifferent. And we agree with the opinion that an exceptionally good casing deserves a distinctive name. Ames Holden's "Auto-Shoes" are miles better in performance than ordinary tires. That has been proved to our satisfaction. So we think it's a good idea to identify such unusual mileage givers by an easy-to-remember name—"Auto-Shoes."

The main purpose of the name is to help you to get cheap, good tires. It's guaranteed that if you buy Ames Holden's "Auto-Shoes" you'll get the best you can get. If security for adjustment should ever arise you will find that you will get satisfaction without trouble or red tape.

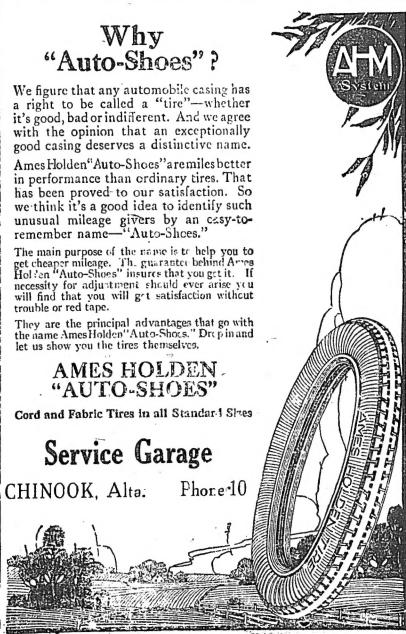

They are the principal advantages that go with the name Ames Holden's "Auto-Shoes." Drop in and let us show you the tires themselves.
